Mr. John Pastorello  
Refrigeration Technologies  
1111 N. Armando St  
Anaheim, CA 92806

Dear Mr. Pastorello:

LRC Coil is pleased to recommend Viper Aerosol, Viper HD and Viper E+ cleaning formulations for use on coils manufactured by LRC. The use of an aluminum safe formulation is important to maintain the long term performance of our coils out in the field. Improper cleaners leads to poorer performance, higher energy consumption and significantly shortens the life of our coils. The use of the Viper series of cleaners will lead to longer lived, higher performing systems over a systems life.

Sincerely,

Mike Williams, P.E.  
President
